

IT EFFECTIVENESS ASSESSMENT

A rapid IT Effectiveness Assessment is one of the many services in our Advisory practice. This assessment leverages our deep healthcare experience working in and with organizations to help them become more efficient and effective. Quite simply, our goal is to enable your users to use technology to work smarter and not harder. The IT Effectiveness Assessment is a four-week engagement that will identify the areas of opportunity to improve outcomes. By assessing where misalignment occurs between technology and process, our experts will provide actionable recommendations to get back on track. This flexible assessment can scale up or down to address parallel workstreams as needed to meet the four-week schedule.
